DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-5 and 8-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of JP Publication No. 09-143062 (hereinafter "'062"), JP Publication No. 04-266742 (hereinafter "'742"), International Publication No. WO 92/10154 (hereinafter "'154") and JP Publication No. 01-233212 (hereinafter "'212").

4. '062 and '742 each discloses a pressure sensitive adhesive composition that contains in prescribed amounts (a) an acrylic pressure-sensitive adhesive containing a copolymer, (b) a polyhydric alcohol, and (c) a prescribed fatty acid metal salt, and a tape containing the pressure sensitive adhesive useful in adhesive drug composition. '154 and '212 each discloses the idea of adding a sorbitan ester compound as a skin drug absorption promoter in about an amount prescribed. All limitations of the present invention are taught by combining the references. Thus, claims 1-5 and 8-15 are unpatentable.
